The latest on Odus online

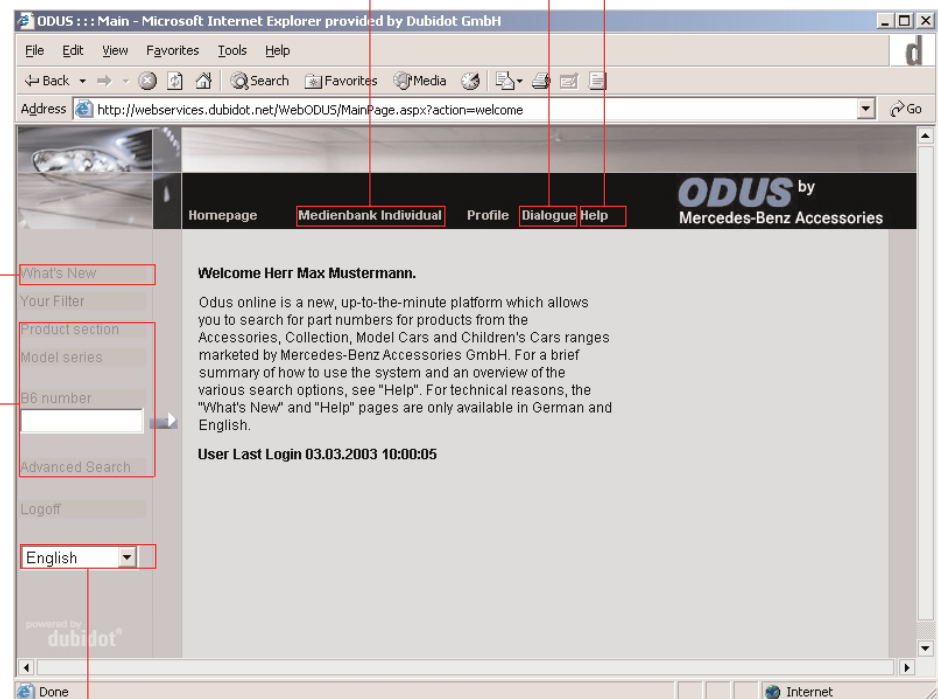

Search functions

“Product Section”:
search based on new
MBA product hierarchy

“Model Series”:
search based on specific
model series

“B6 Number ”:
entering a B6 number
will take you directly to
your selected product

“Advanced Search”:
here you can search by
key word and limit your
search by specifying
additional details (e.g.
model series, etc.)

Selected language

You can select your language of choice here

Quick guide

The quick guide below is designed to allow you to go straight to work with Odus online. If you should have any questions, however, further details are provided on the following pages.

Once you have logged on to the system, select the language you require. You now have a choice of 4 search options:

1. Product Section
2. Model Series
3. B6 Number
4. Advanced Search

1. Product Section

This search will be of interest to you if you are looking for an overview of specific sections of the Collection and Accessories ranges. Select the “Product Section”, then the “Product Group”, “Part Family” and “Range Group” you require, clicking on the green “Show” button once you have selected the “Range Group”. You will now be shown an overview of the “Range Group”.

If you want to view the products individually, click on “Product” in the blue header bar and the relevant overview will appear.

You now have the option of further limiting what you are shown, by clicking on the “+” symbol to activate the filter. This allows you to select “Model Series”, colours and sizes. You can sort the table alphabetically as required by clicking on the appropriate column header (B6 Number, description, Model Series, ...).

2. Model Series

This search is ideal if you are looking for products which are specific to a “Model Series”. Once you have selected the “Model Series”, proceed as described above under “Product Section”. The procedure is slightly simpler here in that the only selection options open to you are those which are appropriate to the defined model series.

3. B6 Number

If you already know the B6 number for the item you are looking for, enter it here and you will be taken directly to that product.

4. Advanced Search

This search is ideal if you have a general idea of the products you are looking for (e.g. floor mats) but don’t know where to locate them within the product hierarchy. Enter a key word and click on “search”. If you already know the required model series, colour or size of the product, you can further restrict your search to speed up the process.

With each search, once you have found the part number you are looking for, clicking on the relevant B6 number will provide further information on the product.

A further click on the “+” symbol allows you to look at images of the product and further comments if these are available.

Search by Product Section

The search by “Product Section” provides you with an overview of the entire Product Range. By selecting a Product Section and then a Product Group, Part Family, Range Group and finally a Product, you gradually narrow down your search until you find the product(s) you are looking for.

The Product Section route

Selection

Product section: Technical accessories

Productgroup: Protection & care

Partfamily: Floor mats

Rangegroup: Velour floor mats

Filter

You will probably want to restrict this result list.

You may already have a specific idea of the colour you are interested in, for example, and you can significantly reduce the number of products in the result list by specifying a colour. To do this, open a filter by clicking on the “+” symbol.

Now select a colour - “pine green” for example.

Define Filter

Selection

Product section: Technical accessories

Productgroup: Protection & care

- merlin blue
- multi-green
- mushroom
- orion grey
- orion grey (GB)/gray (US), medium
- pacific blue
- pebble
- pebble beige
- pine green

Search

Tip:

A quick way of finding “pine green” in the selection box is to click on the box and enter “p”. Use the arrow keys to highlight individual entries in the list and confirm each selection using the Enter key.

Once you have defined your filter and restarted the search, you will be shown a significantly shorter result list.

Advanced Search

In the “Advanced Search” one or more key words can be entered in the text box, which should always be separated by a space.

The result list will contain all products whose description contains one or more of the key words you have specified.

Here too you can further restrict your search by selecting a model series and/or a colour.

Example:

Key words: velour driver

Model series: S-Class (W 220 from 09/2002)

Confirm your query by clicking on “Search”, and your results will appear on the screen.

Enter key words

Search by B6 Number

Use the search by B6 Number if you know exactly which product you are looking for and already have its B6 number. Simply enter the B6 number in the text box and confirm it using the Enter key. You can either enter the full B6 number - "B66962133"- or leave out the "B6". This is the quickest route to a particular product page.

If you click on the "+" symbol, you will be shown further information on the product and, if available, an image.

Description

Errors in the database:

If you find an error in our database, please let us know as soon as possible. We promise to respond to all e-mails sent to: produktinfo.mba@daimlerchrysler.com

Every month during 2003 the names of all those who have contacted us about errors will go into a prize draw and you could win one of 3 scale models (1:18).

Odus Online

Thanks to Odus online, searching for products has never been easier. However, if you should have any queries about how to use the system, or about its contents or its various functions, we will be happy to help.

Just use the "Dialogue" function to send us an e-mail.

If you have any questions about the contents of the database, contact:
Produktinfo.mba@daimlerchrysler.com

If you have any technical queries, contact:
Odus.support@mb-individual.de

Technical specification

System requirements

For the components of the ODUS online architecture to function perfectly, the following system requirements apply:

Servers

Dedicated server systems should be available with the minimum configuration below.

SQL server: 512 MB RAM, 4 GB hard disk, Pentium III 450 MHz. Operating system: Windows 2000 Server with SP2, MS-SQL Server 2000 with SP1, plus Microsoft Data Access Components MDAC 2.6 SP1 and MSXML Parser 4.0.

Media host: 512 MB RAM, hard disk partitioned according to internal media memory requirements, Pentium III 450 MHz. Operating system: Windows 2000 with SP2.

Web server: 512 MB RAM, 4 GB hard disk, Pentium III 450 MHz. Operating system: Windows 2000 Server with SP2 with Internet Information Server (IIS)5, plus Microsoft .NET Framework.

Software

Microsoft Internet Explorer 5.0 or higher, MS Media Player, Version 7.1.
